TECHNICAL SKILLS

Languages: Javascript, Typescript, PHP, Dart, Python
Frameworks: Bootstrap, Directus, Flutter, Laravel, NodeJS, NestJS, React, React Native, Sass, TailwindCSS,
Databases: Firebase, MongoDB, MySQL, PostgreSQL, Sqlite
Developer Tools: AWS S3, Docker, Git, Insomnia, Linux, Npm, Postman, Redux, ClickUp, Figma, LambdaTest, BrowserStack, Responsively, Ngrok

WORK EXPERIENCE

Full Stack Software Engineer
JLabs Innovatech Inc.

September 2024 - January 2026
React, NestJS, Laravel, React Native, Flutter, PostgreSQL, AWS S3

- Led a mobile-first redesign and cross-platform app improvements by refactoring core architecture (state management, navigation flow, folder structure), building reusable UI components, resolving critical bugs, and improving startup time, memory usage, and overall performance across devices.
- Built and maintained scalable backend systems by implementing authentication flows, optimizing RESTful API and database query performance, creating background jobs/queue workers, and integrating third-party services such as maps, SMS, email, and AWS S3 for efficient, team-wide asset handling.
- Strengthened product quality through hands-on QA, regression validation, edge-case testing, and performance troubleshooting, while managing Sentry logging, maintaining a stable staging environment, refining requirements, and collaborating closely with designers and product managers.

IT Support Associate Intern
Innovuze Solutions

Feb 2024 - May 2024
Docker, Git, MySQL, Linux

- Contributed to the development of a robust, self-hosted web server infrastructure, establishing a solid foundation for efficient deployment and management of web applications.
- Facilitated the migration of codebases to FastAPI and ReactJS, resulting in improved performance, scalability, and maintainability.
- Successfully deployed applications on self-hosted infrastructure, ensuring high performance and security. Implemented Docker containerization for streamlined deployment and maintenance processes.

CERTIFICATES & TRAININGS

The Complete 2024 Web Development Bootcamp	JavaScript Essentials 1
JavasScript Essentials 2	CCNAv7: Enterprise Networking, Security, and Automation
Cyber Security : CyberOps Associate	IoT Fundamentals: IoT Security

PERSONAL & COLLABORATIVE PROJECTS

CommuniSync : A Subdivision Management System
University Project — Project Head | Full Stack Developer | Mobile Developer
Tech: Laravel, Blade, MariaDB, Firebase Cloud Messaging, Git

- Migrated core web features to a scalable API and admin portal, developed secure RESTful APIs, and built the cross-platform mobile app for seamless multi-platform integration.
- Implemented Firebase Cloud Messaging for real-time push notifications, optimized data flows and database queries, and performed end-to-end QA including regression checks, edge-case validation, and UX refinement.
- Deployed the full system to a live environment, ensuring stable production access, maintainable architecture, and smooth collaboration across the project team.

Professional Project — Real Estate Asset Analysis Platform
Role: Full Stack & Mobile Developer
Tech: React Native, Laravel, AI Integration, Webhooks, PDF Generation, Email Services

- Developed mobile and admin portal applications to facilitate real estate asset analysis, creating complex data structures and dynamic questionnaires to estimate property values using AI-driven calculations.
- Revised legacy implementations, fixed critical bugs, optimized mobile UI/UX, and integrated webhooks email services, and PDF generation for automated reporting.
- Streamlined data flows, ensured cross-platform consistency, and enhanced platform reliability by implementing robust state management, backend integration, and reusable components.

EDUCATIONAL BACKGROUND

University of Science and Technology of Southern Philippines

- Cum Laude | Iskolar Sa Dakbayan (Cagayan de Oro City Scholarship Awardee)
- Bachelor of Science in Information Technology
