TECHNICAL SKILLS

Languages: Javascript, Typescript, PHP, Dart, Python
Frameworks: Bootstrap, Express, Flutter, Laravel, NodeJS, NestJS, React, React Native, TailwindCSS
Databases: Firebase, MongoDB, MySQL, PostgreSQL, Sqlite
Developer Tools: AWS S3, Docker, Git, Insomnia, Linux, Npm, Postman, Redux, ClickUp

WORK EXPERIENCE

Jr. Full Stack Software Engineer September 2024 - Present
JLabs Innovatech Inc. React, NestJS, Laravel, React Native, PostgreSQL, AWS S3

- Led the mobile-first UI redesign, resolving critical bugs, optimizing performance, and ensuring smooth state management across the app. Developed reusable components to streamline development and maintain consistency.
- Built and maintained RESTful APIs, managed complex data structures, and handled database schemas, migrations, and seeders to ensure scalability and robustness.
- Enhanced data flows, fixed critical bugs, and integrated third-party services like maps, messaging, and email to improve platform functionality and user experience.
- Developed and maintained cross-platform mobile applications (iOS/Android), reworking UI, optimizing data structures, and refining processes to improve compatibility and performance.
- Created and configured AWS S3 storage for efficient asset handling, enabling scalable file management accessible across the team.

IT Support Associate Intern Feb 2024 - May 2024
Innovuze Solutions Docker, Git, MySQL, Linux

- Contributed to the development of a robust, self-hosted web server infrastructure, establishing a solid foundation for efficient deployment and management of web applications.
- Facilitated the migration of codebases to FastAPI and ReactJS, resulting in improved performance, scalability, and maintainability.
- Successfully deployed applications on self-hosted infrastructure, ensuring high performance and security. Implemented Docker containerization for streamlined deployment and maintenance processes.

CERTIFICATES & TRAININGS

The Complete 2024 Web Development Bootcamp	JavaScript Essentials 1
JavaScript Essentials 2	CCNAv7: Enterprise Networking, Security, and Automation
Cyber Security : CyberOps Associate	IoT Fundamentals: IoT Security

PERSONAL & COLLABORATIVE PROJECTS

CommuniSync : A Subdivision Management System | Laravel, Blades, MariaDB, Firebase Cloud, Git
Project Head | Full Stack Developer | Mobile Developer
Repo: <https://github.com/m-montefalcon/CommuniSync> | https://github.com/m-montefalcon/Communisync_Mobile

- Crafted secure RESTful APIs with Laravel authentication and seamlessly integrated them across web and mobile platforms for an optimal end-to-end experience.
- Utilized Firebase Cloud Messaging for effortless push notifications from web to mobile integration.

PanCoffeeKo: Coffee Shop POS & Inventory Management System | Laravel, MySQL, React, Tailwind, DaisyUI
Project Head | Full Stack Developer
Repo: <https://github.com/m-montefalcon/PanCoffeeKo> | <https://github.com/m-montefalcon/PanCoffeeKo-Frontend>

- Developed a robust Coffee Shop POS & Inventory Management System using Laravel and MySQL backend, integrated with a ReactTS frontend for seamless user experience.
- Implemented responsive design using Tailwind and DaisyUI to ensure optimal performance across devices, enhancing usability and accessibility of the application.

DrinkSaOh : Inventory Management System | Firebase Cloud, PHP, Git
Repo: <https://github.com/m-montefalcon/DrinkSaOh> | <https://github.com/m-montefalcon/drinksao-mobile>
Project Head | Full Stack Developer | Mobile Developer

- Contributed to a collaborative project by overseeing the user interface and experience design for enhanced usability.
- Optimized cloud storage efficiency through the implementation of Firebase

EDUCATIONAL BACKGROUND

University of Science and Technology of Southern Philippines

- Cum Laude | Iskolar Sa Dakbayan (Cagayan de Oro City Scholarship Awardee)
- Bachelor of Science in Information Technology
